HDPE Bottle / Container Washing System

Features

The HDPE washing line is designed for rigid plastics with a wall thickness ranging from 1~25mm such as HDPE Bottle, etc.

- 1

The shredding system is with wear resistant design to maximize the consistent running of the system and minimize operational costs.
- 2

High speed washing system with corresponding speed according to material type liberates contamination from plastic flakes.
- 3

The under water force-washing paddle of the washing tank maximize the washing efficiency.
- 4

Mechanical and thermal drying system minimize the moisture of the end product.

- 5

Label separation can be achieved by advanced wind separation.
- 6

Intelligent system automation ensures that components actions are sequenced and monitored.

Applications

- Liquid drums & containers
- Milk bottles
- Wheelie bins
- Pipes
